

IHM-CG Meeting

- Standardization of IHM on Ship Recycling -

Date: 30th November 2011

Time: 15:00 – 17:00

Participants: 18 persons

Venue: 2nd Floor “Venice Room”, Paradise Hotel,
Busan, Korea

IHM-CG Meeting

Agenda

Ship Recycling – CG Review and IHM Preparation
by CG Coordinator

Recycling of Ships – PrimeShip-GREEN/SRM

Practical solution for IHM development on the WEB
by NK

Software for IHM & MD developed by CCS

Others

Report of ACS Meeting – Ship Recycling

IHM-CG schedule

CG Review and IHM Preparation by SAJ

The course of IHM-CG

- At the 4th ASEF, the necessity of a common manual for developing IHM and the necessity of a unified MD format were recognized.

For this purpose, a Correspondence Group was established to exchange views on this issue, coordinated by SAJ.

- May 26 Invitation mail to the related persons
- July 8 Mail the draft materials of IHM-CG to CG members

Situation of IHM preparation in Japanese shipyards.

Necessity of unified manual and unified MD format

PrimeShip-GREEN/SRM by NK

In 2009, NK launched the IHM development software for ship builders and MD/SDoC tools for suppliers.

In April 2011, NK released the software of Web version “PrimeShip-GREEN/SRM”.

Secure and access for PrimeShip-GREEN/SRM is controlled by Web based single database.

Shipowners can review IHM and revised the IHM for newly installed products during operation.

NK intends to develop to utilize the same Web application through the whole industry, from shipbuilding to ship recycling.

Demonstration of PrimeShip-GREEN/SRM.

Software for IHM & MD by CCS

CCS presented their software for IHM & MD.

Main composition is MD/SDoC creation tool and IHM creation tool.

MD is the same as those in the guideline.

Chinese and English version.

Particular point is that the MD creation method from part and material MD is considered.

CCS intends to develop Web-based software in the near future.

Report of ACS WG – Ship Recycling

The representative of Asian Classification Societies (ACS) Ship Recycling WG (SR/WG) reported the progress of the SR/WG.

The SR/WG held a Face to Face Meeting in August 2011 in Tokyo. All members of ACS as BKI, CCS, IRS, KR, NK and VR attendend and concluded;

- To make standardize MD format in ACS, and
- To take a F/S on common software as a next step.

After some discussion, the representative of ACS SR/WG agreed to report the CG's request for facilitating SR/WG's activity on standerization of MD format to the SR/WG members.

IHM-CG Meeting

Purpose:

- To make common manual for developing IHM.
- To use unified MD format.

Direction of common manual:

- The constitution of the draft manual is acceptable, in general.
- Necessary data and interpretation that can support to prepare IHM, MD and SDoC smoothly should be described in this manual, so that all the shipbuilders and all the makers can deal everything similarly by the same method.
- The unified interpretation according to the common manual should be used among classification societies.

Unified MD format:

- To expect ACS's WG activity.
